2024 SWANA Northwest Regional Symposium

Innovation: Shaping the Future of Materials Management

May 1 - 3, 2024

Hosted by The Beaver Chapter of SWANA

McMenamins Edgefield - Troutdale, Oregon

The SWANA Beaver Chapter Symposium Program Committee is seeking speakers interested in presenting as part of the Technical Program of the 2024 SWANA Northwest Regional Symposium.

Our program theme this year is ***Innovation: Shaping the Future of Materials Management***, envisioning a future that promotes innovative practices for materials management. We have identified some tentative session topics below but welcome all ideas relative to the program theme. In particular we are interested in ideas, approaches, and solutions to the challenges around materials management in reference to the following topic areas: Waste Management, Safety, Sustainability, Diversion, Recovery, Recycling, Innovation, and Compliance.

Each presentation will last approximately 30 minutes, including questions and answers. As an added bonus, speakers will receive free registration to the Symposium on the day you are selected to speak.

To be considered as a presenter for a technical session, please submit a presentation abstract (300 words or less), along with your presentation title and subject, speaker bio, and contact information, **by January 27, 2024**. Submissions should be emailed to the Beaver Chapter, Technical Program Committee, at Symposium@swanabeaverchapter.org.
